

## Next on the Auction Block: Access to PAL Licenses in the Upcoming FCC CBRS Auction and Secondary Market Opportunities

KC Halm and Heather Moelter of Davis Wright Tremaine will discuss the state of the CBRS industry in 2020 with CommScope's Mark Gibson.

---

### Join Davis Wright Tremaine and CommScope for a WIA Webinar

---

The 3.5 GHz band, also known as the Citizens Broadband Radio Service (CBRS), is creating exciting new opportunities for wireless deployment. Now that full commercial deployment across the nation is a reality, understanding the opportunities presented by the upcoming auction and anticipated secondary market is essential. In addition to the FCC's anticipated auction framework and rules to assign Priority Access Licenses ("PALs") to winning bidders, this webinar will explore certain anticipated secondary market opportunities expected to arise after the auction and examine key considerations for providers that intend to be active in that market.

Join WIA Members **KC Halm** and **Heather Moelter**, of Davis Wright Tremaine, and **Mark Gibson**, of CommScope, to explore what is ahead in this dynamic space. The webinar will take place at 2 p.m. ET on Thursday, Feb. 20, 2020.
